## Profile

Motivated software engineer with experience in ReactJS, Laravel, and Python. Seeking a role where I can apply my skills in full-stack development and grow with a forward-thinking organization. Good Communication and Analytical skills, motivated, energetic team player with demonstrated proficiency for learning new tools and business environment. An easily adaptable team leader with demonstrable experience of working within pressurized environments. Looking for the innovative organization in order to grow professionally, enhance and use existing skills to reach the organization's goals.

### Personal Skills

- Excellent **communication** skills and the ability to build **cohesive, productive teams**.
- Strongly Believe in **self-awareness and continuous learning**
- **Leadership** and **team management**

### Technical Skills

- ReactJs
- JavaScript
- NextJs
- Laravel
- HTML
- CSS
- JAVA
- C
- C ++
- Basics of Python
- MySql

## Project Summary

**Topic: - Secured Self Distributive System Using Cloud Computing Technology**

**Description: - Java, Netbeans 7.2.1, MySql**

The size and complexity of big data makes it difficult to use traditional database management and data processing tools. Data is being created in much shorter cycles from hours to milliseconds.

It has driven the need for technological infrastructure and tools that can capture, store, analyze and Visualize vast amounts of disparate structured and unstructured data.

We propose an efficient and fine-grained data access control scheme with privacy-preserving policy, where the whole attributes are hidden in the access policy rather than only the values of the attributes.

**Responsibilities: -**

- To provide security to the data.
- Easy to carry all document.
- Helps all citizens.
- Covering large geographical area

**Topic : - Text Summarization using NLP Technology**

**Description: - Python, Html, Css, Flask**

Text summarization is the process of distilling the most important information from a source (or sources) to produce an abridged version for a particular user (or users) and task (or tasks). A summary is a text that is produced from one or more texts, that conveys important information in the original text, and it is of a shorter form. The goal of automatic text summarization is presenting the source text into a shorter version with semantics. The most important advantage of using a summary is it reduces the reading time.

**Responsibilities: -**

- To understand the concepts of natural language processing and creating a tool for text summarization. The concern in automatic summarization is increasing broadly so the manual work is removed. The project concentrates creating a tool which automatically summarizes the document.
- We aim to develop extractive based model.
- We have covered only single document summarization.

## Achievements

- Participated in inter School Drawing Competition
- Participated in inter School Speech Competition
- Won School level General Knowledge Competition

## Additional Qualification:

- Completed Online Course in ReactJs on Udemy.
- Completed Online Course in Introduction to Html, Machine Learning, Html Fundamentals, C++ And Java.
- Pursuing Online Course in Introduction to Cyber Security on Udemy.
- Pursuing Online Course in Swift4, Python Core

## Interests

- Learning and raising awareness about the new technologies.
- Playing outdoor games.
- Travelling to various places exploring the different cultures and people.

## Experience summary

- Currently working at Sai Ashirwad Informatia as a Software Engineer, Built 10+ responsive web applications using React and Next.js, Tailwind CSS and Laravel to develop innovative solutions.
- 1 year of work experience at PACE junior science college as CS Lab instructor.
- Completed 5 month of internship in web development with Html, Css, JavaScript and React Js.
- Completed 1 month of internship in web development using HTML and CSS.

## Educational Qualifications

**B Tech in Computer Science Engineering (2019 to 2022) with First Class With Distinction.**

**Diploma in Computer Engineering (2017 to 2019) with First Class With Distinction.**
